M.E.R.N full-stack web developer with the ability to communicate effectively, work in high-pressure environments, and is a natural problem solver. I love to learn about new technologies and apply myself in difficult situations that require thinking outside the box. Recently graduated from Denver University coding Bootcamp as a full-stack web developer.

Projects

M(oo)vy Space: Movie search and recommendation application based on liked movies

Live Link: (coming)

- Spearheaded overall front end development to make an easy to use website that has an aesthetic UI/UX design and templates that are easy to manipulate for the back end. Made with React, SCSS, JS, HTML, Express, Node.js, GraphQL, MongoDB, and Mongoose
- Worked with a team of 5 to create a full stack MERN application in less than 2 weeks

CO Building Solutions: Store front website selling lumber and roofing services

Live Link: (coming)

- Single handedly created a store front website for a local small business from scratch using React, SCSS, Javascript, and HTML.
- Worked independently to create a frontend ecommerce website for CO Building Solutions

Book/Coffee Finder: An application that recommends a coffee to drink with the searched book

Live Link: [Coffee & Book Finder](#)

- Front end lead with a focus on API's call/fetches with an intuitive UI/UX web design using JS, CSS and HTML
- Worked on a team of 3 to develop a front end website in less than 2 weeks
